

### Falcon Industrial and High Temperature SSG and SSG-RP Series UPS

Industrial operations demand the highest level of power quality, otherwise critical applications can come to a grinding halt. Falcon Electric's high temperature and ruggedized on-line Uninterruptible Power Supplies are the industry's number one choice for protection against costly power problems.

Falcon Electric's SSG® Series (1.5kVA to 6kVA) and SSG-RP Series (1kVA to 3kVA) Uninterruptible Power Supplies (UPS) offer the most reliable power protection in the industry for applications in harsh environments with high temperature extremes. Protect your valuable instruments, PLCs, controllers and other sensitive equipment from the damaging effects of unstable and/or "dirty" power.

#### SSG-RP Series High Temperature UPS (1kVA to 3kVA)

- True Double-Conversion On-line Sinewave Design UL Listed from -22°F to 149°F Operation
- Hot-swap, 10-year rated high-temp batteries
- Extended Hours of Battery Backup Time
- High Temperature LED Display
- Extended Brownout, Plus Surge & Transient Protection
- Precision Output Voltage Regulation
- Ready-to-Install NEMA Rated UPS Systems
- Optional Frequency Converter Capability
- Optional Conformal Coating
- Remote Emergency Power Off
- RS-232C, USB & Optional SNMP/HTTP Agent
- UL 1778, UL 508, cUL Listings and CE Certification

#### SSG Series Industrial UPS (1.5kVA to 6kVA)

- True Double-Conversion On-line Sinewave Design UL Listed from -4°F to 131°F Operation
- Hot-swap, 10-year rated batteries
- Extended Hours of Battery Backup Time
- LCD Display with Advanced Monitoring
- Extended Brownout, Plus Surge & Transient Protection
- Precision Output Voltage Regulation
- Ready-to-Install NEMA Rated UPS Systems
- Optional Frequency Converter Capability
- Optional Conformal Coating
- Remote Emergency Power Off
- RS-232C, USB & Optional SNMP/HTTP Agent
- UL 1778, UL 508, cUL Listings and CE Certification

### Why Choose Falcon Products?

Falcon Electric is a leading manufacturer and pioneer with a reputation for reliability, engineering excellence and innovation for over 25 years. Over two million Falcon products are installed worldwide. Our technology milestones include:

- First high capacity, DOT approved Lithium Poly battery system for rugged, military UPSs
- First patented high-frequency transformerless, on-line UPS technology for the U.S. market
- Pioneer of high-temperature UPS with UL 1778, UL 508, cUL and CE Approvals: SSG Industrial and SSG-RP High Temperature Series UPS
